

Energy Decisions

Or, Why Utility Accountability is Part of the Just Transition Puzzle

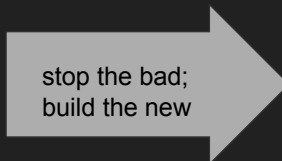

Just Transition Framework

from Movement Generation

Extractive Economy

dig, dump, burn;
wealth and power for some

Regenerative Economy

regenerative use of resources;
deep democracy

Utility Accountability

Part of the Transition Puzzle

- Who gets to make decisions about our energy?
- On what basis?

Context

How did this system develop?

Our current system is incredibly untransparent -- there is almost no way for the public to meaningfully participate in energy decision-making

Beyond Coal

How did the public gain some leverage over decisions about coal in Washington State?

Next Steps?

**PUGET SOUND ENERGY
HAS A BAD GAS
PROBLEM.
IT STINKS.**

Thank you!
